STAT

Processing

The latest release of Message Processor System (MPS) which incorporates the Phase II enhancements has been accepted and is processing in all three computer centers. [REDACTED]

STAT

A new Registry Database (EXAREG) for the Office of External Affairs (OEA) was brought online to GIM production on 21 March. The LAMS database will become part of the EXAREG database in the near future. [REDACTED]

STAT

Special Projects Staff

DIA Early Capability users will have terminals running at 4800 bps instead of the 9600 bps SAFE standard speed until the 9600 bps cards are installed in the Timpex multiplexer. Money (\$22,450) has been transferred to the Office of Communications (OC) to procure the additional cards required to support terminal operations at 9600 bps. A shipment date has not yet been provided by Timpex as of 28 March. [REDACTED]

MEMORANDUM FOR: Deputy Director for Administration

FROM:

[Redacted]

Director of Data Processing

STAT

SUBJECT: ODP Report for Week Ending 1 April 1983

1. SAFE Early Capability

The CIA SAFE Early Capability system was placed into production mode on 28 March, the scheduled initial operational capability date. Approximately 50 users have been defined on the system as having access to the system. The user population included 31 current Pilot Mail Operation (PMO) users who were moved from the [Redacted] Center's PMO system to the SAFE-C Early Capability system on 21 March.

STAT

The first SAFE course for the Office of Central Reference (OCR) SAFE User Representatives (SURE) was successfully conducted by the Office of Training and Education (OT&E) from 14 through 25 March.

Eight of the 18 identified DIA support personnel have received CIA badges to facilitate their DIA Early Capability support responsibilities. Of the eight badged DIA personnel, four are computer operators, three are system programmers, and one is a user support representative. One of the three system programmers is going to begin working with OCR in modifying the PMO job-stream for the DIA system. This activity is now on the critical path of activities required to implement the DIA system.

2. SAFE Terminals Installed

We have continued to deliver new SAFE user terminals to customer areas. The terminals were connected by the Office of Communications (OC) on 31 March. The 6G corridor terminals will be delivered and connected this coming weekend, thus completing all of the early capability installations. The 6G corridor terminals are being located in areas where there was some renovation activity which had to be completed before OC could begin wiring.

3. GRAPHICS Demo for the Intelligence Community (IC) Staff

A demonstration of the TACK system was presented to [redacted] and several other members of the IC Staff on 22 March. Also in attendance were several Office of Research and Development (ORD) personnel. The group was interested in learning about geographic and cartographic systems which are currently in use in the CIA to aid in their planning for the acquisition of future geocarto systems.

STAT

4. Support to the Office of Security (OS)

FOURCEE (Community-wide Computer Assisted Compartmentation Control System). An Implementation Group meeting was held on 28 March to conduct 4C readiness review in preparation for Initial Operating Capability (IOC) on 4 April. Our plans are for the Agency and six other Community agencies to be operational at IOC.

5. Significant Events During Coming Week

None.

March 25, 1983

Honorable William Casey
Director of Central Intelligence
Washington, D. C. 20505

Dear Mr. Casey:

Recently you brought to my attention your deep concern about proposed changes in the federal retirement system. You clearly conveyed in our discussion the great uncertainty and confusion experienced by many Agency personnel about their personal situations.

In light of recent events, it is now possible for me to respond with some observations I trust will offer reassurance to serving Agency personnel. First, the FY 84 budget resolution passed by the House posits no savings associated with changes that would affect current serving federal employees in the Civil Service Retirement System or the CIA Retirement and Disability System. The only provision affecting such employees is a proposed 4 percent comparability increase in federal salaries. The FY 84 budget request contained no increase.

Second, the House leadership, the chairman of the House Post Office and Civil Service Committee and I all agree that any consideration of changes in federal retirement systems must be considered thoroughly and deliberately. No House action on federal retirement changes is planned in 1983.

Third, if changes are considered which affect either CSRS or CIARDS, I intend to insure that the needs and special circumstances of all intelligence employees are fully understood. In particular, early retirement for overseas operational service should be retained.

As you will appreciate, the Senate has yet to act on a FY 84 budget resolution. I believe there is a similar hesitancy on the part of key Senators to change federal retirement policy at this time. In the event of a difference between two Houses, however, the House position on preserving the present system - particularly in the area of retirement ages - is a strong one upon which House conferees would be bound to insist.

-2-

I trust this letter will serve to reassure those employees who have questions about the Congress's attitude to the President's proposals. A competent federal work force, of which a strong intelligence cadre is an essential part, must have retirement systems competitive with those in the private sector. It must also have confidence that the essential features of those systems will not change.

With every good wish, I am

Sincerely yours,

EDWARD P. BOLAND
Chairman
